Bulbs and Plants for Fall Planting

IN PRESENTING our annual 1929 fall catalog this season we do so feeling that it offers a most complete list of bulbs and plants. In the bulb section we have revised the descriptions of nearly all varieties to conform more with our own observations of colors, size and habits of each kind, and added several meritorious kinds that we deem worthy.

We desire to call special attention to the Narcissi, as we believe that we are presenting the largest list of these fine flowers to be found anywhere. Our source of supply for these is the largest grower in America, who brought from Holland all the choicest novelties as well as the best of the older kinds.

Quality Counts—Our policy has always been to serve our customers with the best material obtainable, in every branch of our business. We have found that quality counts in flowers as well as in every other line. All our bulbs are the very best grade obtainable and at prices we offer these for they are much cheaper in comparison with the bulbs that are offered at cut prices. Please remember that it is results that count.

Tulips will be much scarcer this year because of the shortage in Holland, due to an unusual and severe winter there. A large percentage of the tulip and crocus crop was damaged by a late frost, which has prevented many of the bulbs from maturing. The result being that lots of inferior bulbs will be offered.

Flowers in Winter Time—The pleasure of growing your own flowers during the winter months can be had at very little expense and almost no trouble, by potting some of these bulbs for house culture. Their development will prove most interesting and the joy they radiate will be shared by everyone.

Service—A complete horticultural service is available to all our friends and customers at all times. This is made possible by our large organization of trained experts in various departments of our business, who will cheerfully advise you on any problem. The staff in our flower shop, greenhouse, nursery or landscape construction departments is always at your service.

Special Offer of Bulb Collections for Indoor Culture

We offer these collections at a reduced price with the object of inducing those who have not tried and experienced the pleasure of growing bulbs indoors to try them.

As great a variety as possible of the kinds best suited to house culture will be found in these collections. No substitutions can be made.

INDOOR COLLECTION NO. 1

Price \$3.00. By Parcel Post Prepaid, \$3.25. (Value over \$3.75 if purchased separately.)

Contains 24 Early Tulips, in four colors, 6 First size Hyacinths, all different, 6 Daffodils, 2 Paper White Narcissi and 2 Chinese Lilies—forty bulbs in all.

INDOOR COLLECTION NO. 2

Price \$5.00. By Parcel Post Prepaid, \$5.35. (Value over \$6.00 if purchased separately.)

Contains 12 First Size Hyacinths, 12 Early Flowering Double Tulips, 24 Early Flowering Single Tulips, 12 Daffodils and Narcissi and 3 Chinese Lilies—sixty-three bulbs in all.

INDOOR COLLECTION NO. 3

Price \$7.50. Express or Parcel Post Prepaid, \$8.00. (Value over \$10.00 if bought separately.)

Contains 12 Exhibition Size Hyacinths, 12 varieties, 36 Single Early Flowering Tulips in 6 varieties, 18 Double Early Flowering Tulips in 3 varieties, 18 Daffodils and Narcissi in 3 varieties, 12 Rainbow Freesias and 4 Chinese Lilies. Total 100 bulbs.

Bulb Bowls

THESE bowls are especially adapted for growing such bulbs as Chinese Lilies, Paper-White Narcissi and Hyacinths. Most bulb bowls offered are too shallow. These are deep enough for the largest bulbs and insure against the plant falling over when grown up. They are suited for planting bulbs in water with pebbles or the bulb fibre.

MASTIQUE BOWL—The design and soft color effect of pale yellow and blue on grey body is very pleasing, and suggestive of old Egyptian pottery.

5-inch opening, 70c each; 80c each, postpaid
6-inch opening, 90c each; \$1.00 each, postpaid
7-inch opening, \$1.20 each; 1.35 each, postpaid
8-inch opening, 1.50 each; 1.65 each, postpaid

MOTHER OF PEARL CHIPS—For use in bowls or aquariums. These chips are about the size of small seashore pebbles, which they resemble. They have a bright iridescent lustre, which makes them very attractive, particularly for bulb bowls.

1-pound package, 20c each; 25c each, postpaid
5 pounds, 75c. Parcel Post Extra

Mastique

"RAINBOW" PEARL CHIPS—These are pearl chips that have been stained in many colors. They are very pretty particularly in glass bowls when their iridescence is displayed at its best.

1-pound package, 25c each; 30c each, postpaid
5 pounds, \$1.00. Parcel Post Extra

BULB FIBRE—The growing of bulbs indoors is a source of great pleasure during the Winter months. **Bulb Fibre** will be found a great aid and a simple way to grow bulbs. It is scientifically prepared, containing several ingredients in the proper proportions best suited to bulb culture. It is clean and odorless and yet contains plant food such as bulbs need. Should be kept moist and treated like soil. **Quart 20c; half peck 70c; peck \$1.25.** Mail or express extra.

Breeder Tulips

THIS class comprises mainly the old original or mother tulips that were favorites in Holland centuries ago, and from which many of the newer types and species have been bred and developed.

They are very robust in habit of growth. Their size and great lasting qualities makes them unusually well suited for the garden.

The predominating colors are rich bronze, buff, brownish and purple tones, which is overlaid with a silvery sheen or bloom such as is seen on fruits.

Many of them are sweet scented. The time required for the development of the great flowers makes their blooming season later than most other kinds. They require the same cultural direction as the Darwins.

BREEDER TULIPS ARE MAJESTIC FLOWERS

Darwin Tulips

THE Darwins are a development through hybridization of the old Bi-bloom types, and were first originated in France, but have been greatly improved and developed in Holland in the past twenty to thirty years. Darwins are as a whole the best known of the late flowering group, and are considered the "Aristocrats" of Tulipdom. Darwins do not vary in type and shape as much as the other species, but make up for this in their greater brilliance and intense colors, which range from the deepest violet, maroon and crimson to the most delicate shades of pearl and pure white.

Plant the bulbs as closely as desired, about five inches deep, before the sharp frosts harden the ground. Before snow comes to stay, cover well with leaves or straw. Remove this covering in the spring as soon as it is free from snow and ice.

The list of kinds we offer is most complete, all the newer meritorious varieties as well as all the best of the older kinds will be found in this list. All the bulbs we offer are "Top Size," the kind that produce results. We do not and will not handle the culls and inferior grades that are offered at sale prices.

DARWIN TULIPS WILL BLOOM FOR MANY YEARS FROM ONE PLANTING

Darwin Tulips

(Continued)

Darwin Tulips

Sundew—Deep scarlet-crimson. This is a real novelty, the petals are edged with a fine hairy crest that is entirely unique in tulips. The flowers are large and very striking, opening up into a large saucer shape. These bulbs are very scarce but we have secured a fair quantity from the originator in Holland to introduce here at a very attractive price. Every tulip fancier should grow a few of these very novel tulips. (Doz.) (100)
Each \$0.35 \$3.50 \$25.00

The Bishop—Deep, rich violet with dull blue base and white halo. An enormous flower on very strong stem. Height 30". Each \$0.35 3.50 25.00

Thorbecke—Deep wine red with slight suffusion of deep scarlet. Large oval shaped flower on strong stem. Height 23". 1.25 9.00

Cottage and Hybrid Cottage Tulips

COTTAGE tulips as a class comprise a greater variation in form, and a larger variety of colors and shades than any other type of tulips. They are hardy and robust with long, slender, stiff stems, some of them gracefully drooping. The flowers are generally long and oval, others with sharply pointed petals and many open up with gracefully reflexed petals. The Cottage Tulips surpass all others in richness of colors, every imaginable shade can be found among them. Cottage are without question the best cut flower tulips because of their beautiful colorings and their great lasting qualities.

RARE AND UNUSUAL TULIPS

REMBRANDT TULIPS—These are like Darwins in size and form. They are the so-called broken colors that appear as sports from the Darwins. Flowers that revert back partly to the parent flowers, striped and blotched in a great variety of colorations. They were christened Rembrandts for the reason that they resemble the tulip flowers seen in old Dutch paintings.

	(Doz.)	(100)
Well mixed in many unique colors.....	\$1.00	\$8.00

BIZARDS AND BI-BLOOMS—These are tulips that originate in the hybridization of Breeder Tulips, which results in feathered or flamed markings. They present many beautifully marked flowers in unusual coloring. The flowers are of medium size on stiff stems averaging 18 to 22 inches tall.

Bizards —Feathered and flamed brown shades on yellow ground.....	(Doz.)	(100)
Bi-Blooms —Feathered and flamed rose and violet shades on white ground.....	\$0.75	\$6.00
	1.00	8.00

CLUSTER FLOWERED TULIP—This is a new type in tulips. Instead of one flower on a stem these develop a cluster of four, five and six good sized flowers which are all in bloom at same time.

Monsieur Mottet —20. Ivory white flowers.....	(Doz.)	(100)
Madame Mottet —22. Purplish rose flowers.....	\$1.25	\$10.00
	2.50	20.00

WILD OR NATIVE TULIPS—These are termed Botanical Tulips for the reason that they are the original native tulips, found in Asia Minor. They are quite unlike their better known cousins in size and form. The flowers are smaller and the foliage is narrower and lighter. They seem to fit in particularly well in the rock garden.

Clusiana —Small creamy white, star shaped flowers, outside petals flamed deep cherry red. Height 8 to 10 inches.....	(Doz.)	(100)
	\$0.75	\$6.00

Kaufmaniana —Large creamy white flower, beautifully marked with carmine. The earliest flowering tulip. Height 12".....	\$3.00	\$22.50
-------------------------------------------------------------------------------------------------------------------------------	--------	---------

PARROT TULIPS—These curious flowers are both brilliant and showy. The very large flowers are fringed and lacinated in a most fantastic way. They should be planted in the border rather than in beds because of their twisting and curling habit of growth.

Cramoise Brilliant —Deep crimson and scarlet.....	(Doz.)	(100)
Fantasy —Beautiful rosy-salmon with straight, strong upright stem, unlike other Parrot tulips in this respect. Fantasy is a very wonderful and sensational new kind, very scarce. Height 18".....	\$0.65	\$4.50

Lutea Major —Lemon yellow with deeper stripes.....	.65	4.50
Perfecta —Red and yellow with striped shadings.....	.65	4.50
Parrot Tulip Mixture —Many fine kinds.....	.60	4.00

NOTE—Add 5c per dozen for tulips if to be sent by parcel post.

Bizard and Bi-Bloom Tulips

A VARIETY OF TULIPS ADDS ATTRACTIVENESS TO THE GARDEN

Single Early Tulips

Single Early Tulips

THESE are the earliest tulips to bloom in the garden, and the easiest to bring into bloom indoors. Some may be flowered by the end of December if given proper attention. This class contains every hue and color, from the purest snow white to the deepest crimson.

Outdoor Planting. Any good garden soil prepared by spading to a depth of 8 to 10 inches is suitable. Plant the bulbs five inches apart for mass effect, and about four inches deep. The bulbs should all be planted at an equal depth where it is desired to have them bloom equally. Firm the soil well about the bulbs, and cover the beds with leaves or straw before severe cold weather sets in. As soon as snow and ice will allow, remove the covering.

House Culture.—Plant six or more bulbs in a pot, set away in a cool, dark place (a good cool cellar is ideal) for a period of six to ten weeks to allow roots to develop, when quite a number of roots show through upon tipping out of pot. They may then be brought into the warm room and light, to bloom.

The approximate height in inches is indicated by a figure following the variety name.

MAKE A PLANTING OF EARLY TULIPS IN THE FOREGROUND OF YOUR SHRUB BEDS

Dutch Hyacinths

GROWING Hyacinths indoors is a very simple matter indeed, and the pleasure derived in watching the development of the bright cheery, sweetly perfumed flowers during the winter days is ample reward for the slight effort.

INDOOR CULTURE IN POTS—Use ordinary good soil with a little sand to make it more porous. Place a piece of broken crock over the hole in bottom of pot so as to insure free drainage. Fill in with enough of the soil so that the top of the bulb or bulbs is a little below the level of the top. Cover the top of bulbs with soil and firm so as to have at least a half inch below rim. Use 4- or 5-inch pots for the larger bulbs when planting them singly. A number of the smaller bulbs planted in larger shallow pots is very satisfactory. After being potted they should be watered thoroughly and then placed in a cool, dark place (preferably a vegetable cellar) for a period of six to ten weeks. This will induce root growth.

To ascertain the right time to bring them out of the dark, tip the pot upside down, tapping lightly so as to lift pot off soil. If several of the white roots show, it is then safe to bring them into the light.

Hyacinths may also be grown in glasses of water. The bulb should be placed so that the bottom just touches the water and enough water added occasionally to keep it at the proper level. Hyacinths grown in water should also be kept dark until roots 3 to 4 inches are developed. Better results are obtained by growing them as cool as possible.

OUTDOOR CULTURE—Plant the bulbs uniformly about 6 inches deep. Doing so carefully will insure them blooming evenly. When planting a larger bed, the best plan is to remove about 4 inches of soil, firm bulbs in place about 6 inches apart each way, and cover them firmly.

Freesias

These dainty, spicy, sweet-scented blossoms can easily be had in bloom at Christmas if planted early. They are only suited for pot culture as they are not hardy. Plant a number of bulbs to the pot and keep in a cool place such as a vegetable cellar until the roots show through the soil when tipped out of pot. After bringing into light they should be kept in as low a temperature as possible to get best results.

IT IS NOT DIFFICULT TO GROW BULBS INDOORS—ASK US

Daffodils-Jonquils-Narcissi

EITHER of these names applied to any individual kind in this group is perfectly correct, though it has become a somewhat established custom to term the large trumpet types as "Daffodils," and all the short cupped and cluster flowered types as *Narcissus*. In many sections the latter are more popularly known as Jonquils, but actually "Jonquils" form a rather small group, producing small flowers in clusters.

The embargo forbidding the importation of Daffodils a few years ago has resulted very favorably for America in that finer and better bulbs produced in this country are now available. Before the exclusion act became effective a few of the leading Holland *Narcissus* growers brought in their stocks of the choicest varieties, which, while in some instances are not available in large quantities, have added some exquisite new kinds that were not procurable before.

The bulbs which are being produced in America by these expert growers have proven superior to those formerly imported.

Daffodils are among the first flowers that greet us in the spring. Nothing is lovelier or more welcome than the first glimpse of a cluster of these, with their cheerful brightness displayed before the winter snows are quite forgotten, and before many other flowers have started to show signs of activity.

Narcissi prefer a partially shaded location, but will thrive and increase in most any situation. They will continue to increase and bloom from year to year.

They may be grown indoors quite successfully, treating them the same as early tulips, planting them in pots, but should be given more time for root development before being brought into the light. The proper time for this is when a considerable network of the white roots show through when tipped out of pot.

Different Types of *Narcissi*

Barri—The cup or crown measures less than one-third the length of the perianth segments or petals.

Camparnils—Smaller flowers in clusters of three to six.

Incomparabilis—Cup or crown measuring one-third to nearly equal the length of the perianth segments.

Leedsii—Comprises all the low or short cupped crowns with white or silvery perianth, the crown white or slightly colored.

Poetaz—Flowers resulting from crosses between the *Poeticus* and *Polyanthus* *Narcissus*. Flowers in clusters, perianth petals fleshy.

Poeticus—Snowy white perianth with bright, short flattened crown or eye.

Trumpet—Trumpet or crown as long or longer than the perianth.

Evangeline

Albatross (*Incomparabilis*)—Large, pure white, rounded perianth, lemon-yellow crown, beautifully frilled and edged bright scarlet. 20c each, \$2.00 per doz., \$15.00 per 100.

Argent (*Semi-double*)—Large, creamy white flower, with high yellow center. 20c each, \$2.00 per doz., \$15.00 per 100.

Golden Beauty

OUR *Narcissi* come from the largest and most noted grower in this country. In the following list we offer a complete list of the choicest and most desirable kinds. The bulbs are all of the largest size and in perfect condition.

Crocus

Crocus

THESE bright, cheerful flowers are earliest of all to bloom. They are often in bloom before the snow is gone. A few dotted about in clusters in the lawn is a most pleasing view from indoors. The colors come in bright golden yellows, deep blue to light blue, striped and pure white. Plant them anywhere. Do not plant too deep, one inch, not to exceed two inches is best. They may also be grown in pots indoors. Treat same as Tulips or Hyacinths.

COLCHICUM—AUTUMN FLOWERING CROCUS

The flowers of these curious plants do not appear until their foliage has died down. The bulbs should be planted in the rockery or in places where their growth during the early summer months will not be disturbed. The growth stops during July or early August and the fine large flowers come early in September and continue with a succession long after other flowers have been cut down by frost and severe weather. We offer very large bulbs of the two choicest kinds.

Hardy Plants for Fall Planting

ENJOY these hardy, old-fashioned flowers in your yard. Plant them in beds, in borders or in the foreground of shrubbery groups. Such varieties as are listed here are selections of the hardiest sorts and can be advantageously planted in the Fall—preferably early Fall. After the ground has frozen a covering of straw or hay, several inches deep, should be spread over the new plantings as a Winter protection.

For more complete lists and descriptions see our large catalogue "HOME LANDSCAPES." Sent free on request.

Bright Phlox

For Mid-Summer Flowers

PHLOXES are very hardy floriferous perennials that give bold, brilliant color effects from July to frost. They can be had in pure white, pink, lavender and crimson and in varying combinations of these colors.

Where to Plant—They are exceedingly attractive when planted in masses of a single kind in a bed or border. Their midsummer bloom makes them a most valuable addition to beds where such spring-blooming plants as Iris, Peonies, Poppies, etc., are located.

Planting—Space the plants 15 to 18 inches apart and set the roots about 2 inches below the ground surface, making sure that the new eyes are well covered. After freezing weather cover these new plantings with a light mulch of straw or hay.

B. Comte—Bright purplish crimson with satiny sheen. Medium height. One of last to flower. **40c, 2-year 60c.**

Beacon—A bright cherry-red. Large flower heads carried on tall stems. **35c, 2-year 50c.**

Bridesmaid—Tall, with flowers of pure white, with large crimson-carmine eye. **35c, 2-year 50c.**

Champs Elysees—Large trusses of dark crimson-purple, medium height. **35c, 2-year 50c.**

Coquelicot—A bright orange-scarlet of outstanding color. **40c, 2-year 60c.**

Quantity Rate—5 or more of a single variety will be supplied at 5c less per plant, viz., plants priced at 35c each are \$1.50 for 5.

Dr. Konigshofer—Brilliant orange-scarlet, with dark blood-red eye. Medium height. Midseason. **35c, 2-year 50c.**

Elizabeth Campbell—Very large spikes, with flowers of quite a new color—light salmon changing to pink in the center. **50c, 2-year 75c.**

Eugene Danzanvillier—Soft lavender shading lighter to center. **35c, 2-year 50c.**

Frau Anton Buchner—Undoubtedly the finest white Phlox which has as yet been raised. Large flowers of perfect form. **35c, 2-year 50c.**

F. G. Von Lassburg—Purest white; individual flowers very large. Tall, midseason. **35c, 2-year 50c.**

General Van Heutz—Brilliant salmon red, with light center changing later to deep red eye. **35c, 2-year 50c.**

Miss Lingard—The most popular white. Immense heads of white flowers in late June and again in September. **35c, 2-year 50c.**

Mme. Bezanson—Rich crimson medium height. **40c, 2-year 60c.**

Mme. Paul Dutrie—Opens a soft lilac-rose which gets lighter as it ages. **35c, 2-year 50c.**

Mrs. Charles Dorr—A beautiful shade of lavender. Very large conical heads. **35c, 2-year 50c.**

Mrs. Jenkins—Immense trusses of pure white flowers. Early. **35c, 2-year 50c.**

Pantheon—Deep salmon-rose; light center. Very large flower. Tall. **35c, 2-year 50c.**

Rheinlander—A most beautiful salmon-pink with deeper center. Immense size. **35c, 2-year 50c.**

Rijnstroom—A lovely rose pink, much like Paul Neyron rose. Very large flower heads. **35c, 2-year 50c.**

R. P. Struthers—Rosy carmine with claret-red eye. Very bright; tall. **35c, 2-year 50c.**

Tapis Blanc—The finest of the dwarf white Phlox. Snow-white flowers of large size. Height 8 to 9 inches. **35c, 2-year 50c.**

Thor—A rich salmon pink with crimson eye. **35c, 2-year 50c.**

W. C. Egan—Soft shade of lilac with dark pink eye. General effect is a soft rose color. **35c, 2-year 50c.**

Dwarf Phlox

Moss Pink or Phlox Subulata grows 5 to 6 inches high and is a brilliant show of pink or white flowers in late April and early May.

In the rockery or as an edging for borders, on cemetery lots, between stepping stones and in many other locations it makes an admirable ground covering.

Phlox Subulata—White or pink. **25c, 2-year 40c.**

Special Collection of Choice Hardy Phlox

Beautiful Iris

Brilliant in the Garden—Splendid for Cutting

PLANTING—Place the roots just deep enough to be covered with soil. A mulch of hay or straw spread over the new plantings, after the ground has frozen, is a good winter protection.

Quantity Rate—5 or more of a single variety will be supplied at 5c less per plant, viz.: plants priced at 35c each are \$1.50 for 5.

NOTE. In the description "S" or "Standards" refers to the three upright petals. The letter "F" or "Falls" refers to the three drooping or lower petals.

Exquisite Peonies

"The Flower of the Great Northwest"

THE Peony has the largest and most gorgeous flowers of all perennials. Here, under our northern conditions, it grows so easily and blooms so profusely that everyone can enjoy these beautiful plants in his home yard.

Peonies require but little attention after they have been properly planted, while their growth and beauty will endure for many years. Each season they bring in increasing abundance their exquisite blossoms that rival the rose in fragrance and loveliness.

Planting—The roots should be set with the "eyes" 2 to 3 inches below the surface and the soil tightly packed about them. Allow a spacing of about 3 feet between the plants.

The soil should be of good substance and the location free of tree roots and dense shade. Bone meal is preferred as a fertilizer. A light covering of straw, after the ground has frozen, is desirable.]

Quality—The "roots" are substantial plants with 3 to 5 strong eyes. "Clumps" or older stock that will produce greater flowering results can be supplied at double the catalog price of "roots."

The Story in Pictures

*Residence of Mr. G. W. Robinson
Summit Ave., Saint Paul*

These actual photographs show the delightful landscape beauty that developed just 4 years after planting. You can do likewise on your property.

Enjoy Beauty in Your Home Grounds

The full value of your home property is realized only when the grounds are made attractive and inviting. Trees for shade and protection, shrubs for foundation and boundary plantings, flowers for color and fragrance and a soft carpet of green lawn will add untold pleasure to your daily use of the place.

Let Us Help You Plan These Enjoyments and show you how they can be accomplished most economically. A definite plan for the improvements can be developed and you can follow this gradually from season to season if you wish. The actual planting can be done by our skilled gardeners or you can do this yourself following our instructions. Our landscape designer will call at any Twin City address for consultation without charge. Phone us, Cedar 6083 (St. Paul) or Drexel 7245 (Minneapolis).

A Special Plan-By-Mail Service is offered to our out-of-town customers. Our experts will suggest a pleasing and suitable landscape scheme to suit your grounds and give careful cost estimates. Full planting instructions will be given so that you can readily do all planting work. Write us for suggestions.
